Slocum saves a pretty young Mexican girl from a brutal gang, it wouldn't be right to leave her on her own. So the next thing he knows, he's hightailing it to her hacienda with a bunch of serious pistoleros hot on his trail—and a pair of gunslinging bounty hunters not far behind. But cold-blooded killers have to take a number if they want a piece of Slocum. He's got some business to settle with a certain Senorita—and some things take a little time to get right. His trackers might as well hold their horses—since Slocum's got enough bullets for everybody...

Assuming GCSE as a starting point (National Curriculum Level 7/8), this A-Level mathematics text provides transitional material in the early chapters for students from a variety of mathematical backgrounds, and caters for a wide spread of ability. It contains the core for A-Level mathematics as outlined in all examination board syllabuses, and additional coverage is included to cater for the pure maths content of A-Level mathematics courses combining pure maths with mechanics / statistics / decision (discrete) maths, and the first half of A-Level pure mathematics.

Go on the trip of a lifetime. Two Wheels South shows you how to realize your own journey. Two friends take the motorcycle trip of their life--From Brooklyn to Patagonia. Matias Corea shares his insights on how to prepare, choose the right motorcycle, what to pack, how to plan the route, where to camp and last but not least: How to prepare your mind. Setbacks and breaking down are part of the adventure, but preparation and being

on the road teach you the confidence to tackle any problem. Follow Matias Corea and his friend Joel through the American South, Central America over the Darien Gap and beyond, over wooden cracking jungle bridges in Colombia and to dry lake high plateaus in Argentina. Feel the character of the roads and the smell of nature: Riding a motorcycle is one of the purest forms of traveling. After 7 months and 13 countries Matias and Joel have learned a lot while riding down south on their trusty BMW air-cooled G / S overland haulers and are ready to share their experience. Two Wheels South invites you on the experience of a lifetime.

"DECREAZIONE" is a book collecting Joseph Koudelka's images exhibited at the fifty-fifth Venice Biennale, at the Vatican Pavilion. With his suggestive black-and-white images and his moving, desolated landscapes, Koudelka tells stories of destruction, declined in three different forms: time, violence, and contrast between nature and uncontrolled industrial development. Josef Koudelka was born in Moravia in 1938. He published numerous photographic books on the relationship between man and landscape, about gypsy life, and on the invasion of Prague in 1968. Significant exhibitions of his works have been

held at international museums and galleries and he received numerous major awards. A world-renowned conductor and composer who has lead most of the major orchestras in North America and Europe, a talented musician who has played under the batons of such luminaries as Toscanini and Walter, and an esteemed arranger, scholar, author, and educator, Gunther Schuller is without doubt a major figure in the music world. Now, in The Compleat Conductor, Schuller has penned a highly provocative critique of modern conducting, one that is certain to stir controversy. Indeed, in these pages he castigates many of this century's most venerated conductors for using the podium to indulge their own interpretive idiosyncrasies rather than devote themselves to reproducing the composer's stated and often painstakingly detailed intentions. Contrary to the average concert-goer's notion (all too often shared by the musicians as well) that conducting is an easily learned skill, Schuller argues here that conducting is "the most demanding, musically all embracing, and complex" task in the field of music performance. Conducting demands profound musical sense, agonizing hours of study, and unbending integrity. Most important, a conductor's overriding concern

must be to present a composer's work faithfully and accurately, scrupulously following the score including especially dynamics and tempo markings with utmost respect and care. Alas, Schuller finds, rare is the conductor who faithfully adheres to a composer's wishes. To document this, Schuller painstakingly compares hundreds of performances and recordings with the original scores of eight major compositions: Beethoven's fifth and seventh symphonies, Schumann's second (last movement only), Brahms's first and fourth, Tchaikovsky's sixth, Strauss's "Till Eulenspiegel" and Ravel's "Daphnis et Chloe, Second Suite." Illustrating his points with numerous musical examples, Schuller reveals exactly where conductors have done well and where they have mangled the composer's work. As he does so, he also illuminates the interpretive styles of many of our most celebrated conductors, offering pithy observations that range from blistering criticism of Leonard Bernstein ("one of the world's most histrionic and exhibitionist conductors") to effusive praise of Carlos Kleiber (who "is so unique, so remarkable, so outstanding that one can only describe him as a phenomenon"). Along the way, he debunks many of the music world's

most enduring myths (such as the notion that most of Beethoven's metronome markings were "wrong" or "unplayable," or that Schumann was a poor orchestrator) and takes on the "cultish clan" of period instrument performers, observing that many of their claims are "totally spurious and chimeric." In his epilogue, Schuller sets forth clear guidelines for conductors that he believes will help steer them away from self indulgence towards the correct realization of great art. Courageous, eloquent, and brilliantly insightful, The Compleat Conductor throws down the gauntlet to conductors worldwide. It is a controversial book that the music world will be debating for many years to come. Hidden in the mountains of East Tennessee, an eleven-year old goes about the business of being a boy during the summer of 1970. Within a balance of terror and innocence, he bears silent witness to ghosts of the dead and the cruelties of a teenage killer while local justice plays out in a community carved from legacies of coal mining and religion. Johnny Tractor invites the reader to count from one to ten using objects found on a farm. On board pages. Following on from Introducing Pure Mathematics by Smedley and Wiseman,

Further Pure Mathematics covers in one volume all the pure mathematics required by students taking further mathematics. It also provides the basics for mathematics encountered in Higher Education. A clear text is supported by worked examples, exercises, and examination questions. The two books will cover the requirements of Pure Mathematics as part of double-certification Mathematics for any examinations board. · Clearly written explanations and graded worked examples to help students when they are studying alone · Wide variety of exercises · Comprehensive selection of recent exam questions from all the major examination boards

Giorgio Manganelli (1922-1990), one of Italy's most radical and original writers, went further than most in exploring the creative possibilities of hybrid genres and open forms. Ostentation, theatricality, and a love of drapery and verbal excess are defining features of his body of work, which ranges from prose fiction, literary criticism, and drama to travel writing, treatises, commentaries, and imaginary interviews. This study examines the wealth of Manganelli's imagination - his grotesque animals, speaking corpses, and melancholy spectres - and argues that his spectacular eloquence was shaped by an exceptional awareness of literary and philosophical models. Following Manganelli's lead, the author addresses issues such as the boundaries of meaningful language, the relationship between literary and visual texts, fantasy and realism, and the power of literature to express the apprehensions and intimations of human consciousness.

Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing. Providing complete coverage of the 2009 Edexcel IGCSE maths specification, this engaging work makes the information accessible for every student. It contains exam practice throughout, with revision

This is a photo book of beautiful nude models photographed in the red rocks of Sedona Arizona. This book contains 125 pages, with 80 full page professionally photographed images of 6 beautiful models. This is volume two of a series. Volume one has not yet been released (scheduled for late September).

Includes a section on matrices and transformations, this book features worked examples and exercises to illustrate concepts at every stage of its development. It caters for the "Pure Mathematics" content of various courses in Further Mathematics and also for preparation for the Advanced Extension Award.

This volume continues the work covered in Core Maths or Mathematics - The Core Course for Advanced Level to provide a full two-year course in Pure Mathematics for A-Level.

"My heart wandered through the world constantly seeking after my cure, but the sweet and delicious water of life had to break through the granite of my heart." When the words of Rumi enter your heart, something softens, breaks, and is subtly reborn. That he wrote the words seven hundred years ago in a medieval Persian world that bears little resemblance to ours makes their uncanny resonance to us today just that much more remarkable. Here is a treasury of daily wisdom from this most beloved of all the Sufi masters—both his prose and his ecstatic poetry—that you can use to start every day for a year, or that you can dip into for inspiration any time you need to break through the granite of your heart.

landscape of flashing screens and subtle brainwashing, a world where even city streets and public schools are run by big business. This is a darkly comic first novel of a dystopian future, with echoes of 1984 and Brave New World.

A single act of kindness may lead to her greatest loss, or the greatest love she's ever known in this enthralling romance set in California's Old West. California, 1867. The wilderness of Yosemite Valley is no place to be caught alone. When Scotty MacDowell rescues a wounded stranger from a fierce blizzard, she is thinking only of saving a lost traveler. She never expects she's nursing a passionate lover back to health. Seven months later, Alex Golovin returns to Scotty's tiny cabin in the wilderness, but not to take her back into his arms. Instead of the man she loved, Alex returns as an angry lawyer, determined to run Scotty off of her beloved land. Caught between passion and responsibility, Scotty and Alex endure a daily struggle to stay true to their hearts, no matter the cost.

First published in 1951, Cherokee Cooklore introduces us to traditional Cherokee cooking. It starts with a photographic essay as Aggie Lossiah demonstrates how she makes bean bread. This is followed by recipes gathered from the North Carolina Cherokee community (including yellowjacket soup, blood pudding, hominy corn drink, baked squirrel, and hickory nut soup). A description of Cherokee food customs follows. This is a fascinating booklet that provides valuable food lore for the adventuresome gourmet or the student of Native American history.

*The dangers of illegal drugs are well known and rarely disputed, but how harmful are alcohol and tobacco by comparison?
