This collection of poems presents a unique perspective on enduring themes--love, existentialism, the darker side of life in an urban environment, loneliness, quiet heroism and the transcendent power of poetry to rebuild weary souls and teach lessons we may not want to learn. Although several of the poems in this collection have appeared in anthologies and literary magazines, most are published here for the first time and represent a selection of the author's free verse, blank verse, and sonnets from early adulthood through middle age (1977-2006). The author is an Associate Professor of Legal Studies in Business at Hofstra University's Frank G. Zarb School of Business and has previously published seven non-fiction books through traditional publishers. His business law and legal environment textbooks have been used in colleges and universities throughout the United States since 1993. This is his first poetry collection. Test Bank for Introductory Economics and Introductory Macroeconomics and Introductory Microeconomics is an instructor's aid in developing examinations for students to test their comprehension, recall, and ability to analyze and interpret the basic concepts discussed in "Introductory Economics," "Introductory Macroeconomics," and "Introductory Microeconomics." With more than 2,000 five-response, multiple-

choice questions, the "Test Bank" reflects the structures of the texts. The questions cover macroeconomic problems, supply and demand, the problem of unemployment, inflation, and measuring economic activity. Other questions cover aggregate demand, aggregate supply and the economy, fiscal problems, money and banking, as well as money, credit and the economy. Some questions deal with monetarist theory, international trade, the foreign exchange market, international economics. Some interesting response choices concern the problems of the dollar, goals, trade-offs, scarcity and choice, specialization, the micro side of demand and supply. Other questions deal with markets at work, consumer choice, production and costs, producer choice (monopoly), producers in competitive markets, capital, and natural resource market. Professors and lecturers of economics and business courses will find the "Test Bank" very useful. Students of economics, whether they are economics majors are just taking the subject as a requirement in another course, will also benefit from it.

The Uniform Combined State Law Examination

What price would you pay to revisit a crossroad in your life when you had made a terrible, life altering mistake? Would you give up an unfulfilled life for the chance of virtual happiness in a computer-generated alternate reality? Would you sacrifice everything if you could attain absolute knowledge? If so, could you live with the knowledge you attained? It is said that no person is an island, but what if even the least among us is a god in his/her own right? If an alien visitor offered you a lifetime of health and the gift of telepathy in exchange for a small service, would you be quick to accept? And if consciousness utilizes only a small portion of our brain, what function does the larger, presumably unused portion actually serve? These are some of the questions explored in this collection of science fiction and speculative fiction short stories that probes the interrelationship between dreams and reality, the nature of reality itself, and the dangers attendant to the single-minded pursuit of wish fulfillment with its attendant unexpected and unwanted consequences. Most of the short stories published here were written and revised over a period of more than thirty years (1977- 2011) and, with the exception of "To Sleep, Perchance to Dream" have not been previously published. The author is an Associate Professor of Legal Studies at Hofstra University's Frank G. Zarb School of Business and has previously published seven non-fiction books through traditional publishers. His business law and legal environment textbooks have been used in colleges and universities throughout the United States since 1993. This is his first fiction collection.

Through five previous editions, Introductory Statistics has made statistics both interesting and accessible to a wide and varied audience. The realistic content of its examples and exercises, the clarity and brevity of its presentation, and the soundness of its pedagogical approach have received the highest

remarks from both students and instructors. Now this bestseller is available in a new 6th edition. When are legislators inclined to cast votes in cooperation with their parties, and when do they go their own way? When and why do nations contend with each other, and when are they more likely to cooperate? Thematically arranged around the interplay of contention and cooperation, *A Comparative Introduction to Political Science* encourages students to explore causal factors and consequences related to political phenomena to become knowledgeable and resourceful citizens of their nations and the world. Alan Smith covers how patterns of contention and cooperation—and the resulting government policies—may be affected by such factors as the surrounding political framework, the distribution of influence, and political motivation, including values as well as material interests. To expose students to the politics of specific nations, each chapter concludes with two country case studies that illuminate the theme of the chapter. Students emerge with a sense of what is going on in the world today. Pedagogically, the book employs careful sequencing of topics and concepts for clarity and to introduce politics in a natural, logical, synchronized way. At times Smith goes beyond sharp, night-and-day terminological distinctions to add accessible, ordinary language-based terminology that better captures the real-world spectrum between the extremes. *A Comparative Introduction to Political Science: Contention and Cooperation* provides a comprehensive teaching and learning package including these ancillaries: Test Bank. Emphasizing safe and effective drug administration, Introduction to Clinical Pharmacology, 10th Edition, helps you understand the principles of pharmacology and prevent medication errors. It promotes safety by showing how drugs of various drug classes work, so you can understand why drugs are given, as well as the adverse effects and drug interactions that may occur. A thorough nursing process section with each drug class outlines the nurse's role when administering drugs. The new updated Get Ready for the Next Generation NCLEX® Examination! feature offers case studies with Next Generation NCLEX-format questions to help you prepare for the new licensure examination. Ideal scope of content and readability for LPN/LVN programs includes basic, need-to-know pharmacology content. Safety Alert boxes highlight important nursing considerations for safe medication administration and monitoring. Lifespan Considerations boxes for children and older adults draw attention to information that would be especially important when giving a specific drug to patients of these groups. A focus on understanding drug classes helps students understand the actions and uses of drug classes and provides a framework for safe, effective practice as new drugs are introduced to the market. Video clips on medication administration procedures provide students with a visual reference for safe medication administration. Key terms with phonetic pronunciations and text page references help improve students' terminology and language skills before they enter clinical practice. Essential content is highlighted throughout the text, as in all of Elsevier's LPN Threads textbooks, with features such as Top Tips for Safety, Memory Joggers, and Lifespan Considerations boxes. NEW! Get Ready for the Next Generation NCLEX® Examination! section includes key points, review questions, and case studies with Next Generation NCLEX-format questions to prepare students for the new licensure examination. NEW! Reorganized chapters break up lengthy content to more logically present pharmacological content by body system or major disorder. UPDATED! Coverage of newly approved and updated pharmaceutical treatments and drugs prepares students for practice.

This is the Eighth Edition of the comprehensive and well-respected text and reference of pathophysiology. As a nurse

physiologist, Carol Porth uniquely emphasizes "concepts" of altered health states, as opposed to factual descriptions of diseases and disorders. This conceptual model integrates the developmental and preventative aspects of health. By a physiologic approach, the author ensures a comprehension of the whole of body function. By integrating all of the parts of the human body into a total functional whole, the student can grasp both the physical and psychological aspects of health. This edition has a completely revamped art program and new displays that showcase pathophysiological processes through detailed visual representation. Other highlights include a greater international focus, expanded content on evidence-based practice and completely revised, updated chapters on genetics, disorders of white blood cells and lymphoid tissue, innate and acquired immunity. A bound-in CD-ROM and companion Website include Weblinks, an NCLEX® tutorial, a Spanish-English audio glossary, monographs of 100 most commonly prescribed drugs, over 30 Concepts in Action animations, 5 Clinical Simulations, and dosage calculation quizzes. An Instructor's Resource DVD-ROM and online instructor resources are also available.
