"What ingredients go into a thorough health history and physical examination? How do effective interviewing skills, thorough assessment, sound clinical reasoning, and accurate documentation work together to refine our diagnostic choices? These are the kinds of questions you'll explore and answer inside this resource." "Written by a noted nurse educator, this accessible text guides you through the essentials of conducting a clinically relevant assessment and applies these principles to the diagnosis of specific, commonly encountered disorders." -BOOK JACKET.

For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.

An exciting introduction to astronomy, using recent discoveries and stunning photography to inspire non-science majors about the Universe and science.

"A guide to the press of the United Kingdom and to the principal publications of Europe, Australia, the Far East, Gulf States, and the U.S.A.

Joshua's gallery 'Factual Nonsense' was quite unlike any other. Called a 'crazy powerhouse of ideas' it was a kind of cultural think-tank located in the then run-down East End area known as Shoreditch, which would later become a cohesive and creative hub (since rebranded as 'Silicon Roundabout'). Joshua was the driving force that turned the area's fortune and reputation around. Under the auspices of his Factual Nonsense banner, he held some of the most important and influential public art events of the late 20th Century. The first of these was an anarchic swipe at the notion of a traditional village fete called 'A Fete Worse than Death', with some of the biggest but the still yet unknown stars of the art world, including Damien Hirst and Angus Fairhurst, famously dressed as clowns and produced the first spin paintings at the Fete (for sale for the princely sum of £1). Whilst Hirst's spin machine has, from lowly beginnings at the Fete, gone on to appear recently at the World Economic Forum, a billionaire's playground, creating spin paintings for rich oligarch's wives as entertainment, Joshua was to die alone, poverty stricken back in 1996 on the cusp of international fame. Never reaping the rewards that were to come from the economic upturn and Charles Saatchi's Sensation exhibition, his death was a marker for the beginning of an era of international fame and success for his contemporaries and the end of the 'classic' avant-garde. The

list of the seventy or so names of people I have interviewed for the book over the past year reads like a who's who of the contemporary art world, with contributions from the likes of Jay Jopling, Damien Hirst, Sarah Lucas, Sam Taylor-Wood, Gary Hume, Gavin Turk, Maureen Paley and Sir Peter Blake. Although Joshua never achieved the recognition that he deserved in his lifetime, he was a pivotal figure in the London art scene during the early 1990's. Josh moved into Hoxton and opened a gallery there and started a veritable art movement, while the place was a neglected London backwater. His lasting legacy was to bring together a group of artists and gallerists and create what is now known as the YBA scene. The text is illustrated with previously unseen photographs, letters and extracts from Joshua's diaries, which give insight into his thought process as well as the deterioration of his mental state towards the end of his brief but eventful life.

A collection of thematic articles on the geology of southernmost Norway written by geologists familiar with the terrain and recent research results. Prepared as a field trip guide, it includes maps, drawings and photographs and references. Topics covered include: the Telemark Supra crustals and associated gneisses; the high-grade metamorphic Bramble sector; the Agder migmatic gneisses and post-kinematic granites; the Rogaland intrusive masses and their metamorphic envelope; the Faurefjell metasediments; and Precambrian rocks of the Jarem district including those thrust during the Caldonide Orogeny.

Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.

InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

All coordination between cells, organs, and organisms depends on successful biocommunicative processes. There are abundant cases of communication in the biological world, both within (intraspecific) and between (interspecific) single-cell and multicellular microorganisms and higher animal forms. Split into two parts, this book first looks at the history, development and progress within the field of biocommunication. The second part presents real-life case studies and investigation into examples of biocommunication in the biological world. Among the organisms covered are bacteria, fungi, plants, terrestrial and marine animals, including bonobos, chimpanzees and dolphins, as well as a new theory of communication between parts in developing embryos (cybernetic embryos). Contributions from international experts in the field provide up-to-date research and results, while in-depth analysis expands on these findings to pave the way for future discoveries. As the first comprehensive review of its kind, it is perfect for undergraduates, graduates, professionals and researchers in the field of life sciences.
